Marx on Health – Cornel West with Shomit Sirohi on the Question of His Health and the whole Rendition of Prophecy as well – some Prophetic Teaching in Marx

By Shomit Sirohi

I. What happened to you is an ongoing crisis which keeps succeeding and failing but with ruptures and correct victories – Cornel West now jokes and puns from Sirohi's poetic Marx – go for it

In fact I was once in a story of Heights as we joke about some buildings in the American Greenspan life being praised in Christian reveries on his Biblical narrative to India for a good in fact Housing instead and then in fact it moves to in fact a bunch of women everywhere being followed in Brumiares after Brumiares with the basic steps on health not being covered either as Mao remarks in general on all the women Sirohi is busy rescuing in simple doctoring advice and then of course sweeps in the elementary Hegelian metaphysics which is just absolute to hear and so is teaching everyone to keep it simple as they say and follow the Brumiare's doctoral voice which then is ghosts in Marx's life for now twenty months he assures you of walking towards his house and typing recklessly about in fact the Brumiare and dissecting it like a Hegelian metaphor on music – yes I am truly materialist and philosophical now, even health is chiming in like a choir.

II. Cornel West

I argue that in fact the health metaphor with Christian Biblical jokes then is finally how women are ghosts to the Christian life of Sirohi – like a ghost which is Spirit and it is Christian spirit to joke on Spirits as in fact Bruno Bauer as Sirohi was once talking about in German Ideology this is all about – the physician of course Bauer. Jokes and puns with Prophecy.

Sirohi here, in fact that is German Ideology in a nutshell as it were, it is a way of following a materialist conception of Christian Hegel which then is like Bauer the physician who is busy figuring out the wrong medicines for our Chrisitan Spiritual message – don't go for that.

One can just prophecies how in fact the German Ideology covers the projection of people as a film as in fact an idealist company model which is then following Phenomenology of Spirit and the old Marx as well – one should know Marx better – he argues you are already a prophet and fine the moment one was in teaching again method of life – one can just ease into life and swoon in on the women as the greatest philosopher of feminism in history add a dash of elan and music – that is definitely my

prophecy with a dash of further Jewish cure – which seals the deal on the Jewish question – what then is healing, talking about Judaism more and more – which becomes actually the Biblical imagery of Christ healing people, into a polished Jewish man who is busy teaching all the spiritual nicities of health even as crazyiness is now pre-history – of in fact a Black art called Lam which is possessed people who are busy depicting an Afro for resistance.

More prophecy then is how the transformation is mapped out in Anderson, that love of a British empiricist joining the healthcare developments of poverty without Sirohi, which then is the love for poverty in Sirohi's wish of judging this to be not of Jewish wealth and determinate in fact heights – that I would argue comparing charts of Zhuang Zhi would help to say he is going better and better – like a speeding car driving past the others on a long road to freedom, which then is how I formalise the becoming of the for-itself – a bunch of hop skip and jump and return till in fact it wins – it is as simple as that – he has won again and again in some American drama called a race drama with a man who is busy being absolute at worst case with the old Schirmacher and is best seen as an absolute philosopher when in company of a philosopher – called the dyad in Sirohi – like a two, that is busy dyadic and mediated by a triad perhaps – of philosopher philosopher and economist and traditional philosopher which goes in the pure stuff behaviour etiquette he calls his Idealism.

His current process is just following batches of periods which succeed after succeeding and is just success after success – like my own Brumiare being followed as health – simply know that it is ghouls – a small drama in fact I add – not a major one – so in fact successful in-itself as for-itself – more of a philosophical habit kicking in from those who are propelling him towards in fact a discussion on this thing we call philosophy, this humbug.
